

Get the Best Rates for Accepting Purchasing Cards

If your company sells goods and services to other companies or government agencies you probably already accept, or have been asked to accept purchasing cards. These are credit cards issued to employees authorized to make purchases on behalf of their organization.

Purchasing card transaction payments are priced differently than consumer credit card transactions. The key to obtaining the best rates for these transactions is to include line-item detail, "Level-3" information in card industry terms. Level-3 information contains information about the items purchased such as Item Part Number, Description, Quantity, Unit of Measure, Price and more.

3Delta SystemsSM (3DSI) offers card payment solutions that are secure, scalable and easy to implement.

Solutions for All Situations and Company Sizes

3Delta Systems will help you select the best product to fit your particular situation and business need. 3DSI solutions are delivered through its proprietary electronic payment gateway and offer three interface options:

EC-ZoneSM lets anyone with a Web browser process credit card payments. It can be used by any number of employees in any number of locations so long as they have an Internet connection. EC-Zone provides full customer and transaction history – including downloadable detail and reports – and is included with all 3DSI solutions. You can be up and running on EC-Zone in only a few days.

EC-LinxSM is designed for suppliers using or developing Web commerce applications that require real-time payment processing and authorization. EC-Linx allows host-to-host, real-time credit card authorizations via an Internet payment gateway. It can be integrated directly to your accounting system, Web site or other computer system.

EC-BatchSM provides a file-based interface for companies that want a batch interface to their internal computer systems. Files are delivered to and from a secure Internet gateway using the FTP protocol.

Features of 3Delta Systems Products

Supports multiple payment interfaces, including:

- ▲ Internet
- ▲ Mail Order/Telephone Order (MOTO)
- ▲ Card present (swiped)
- ▲ Wireless POS

Processes all major card brands

- ▲ Visa

Provides integration and reporting

- ▲ All products – EC-Zone, EC-Linx and EC-Batch – can be used in conjunction with each other.
- ▲ All products offer the same set of browser-based advanced reporting tools.
- ▲ Payments authorized in real-time with EC-Linx may be settled using EC-Batch.

Ensures compatibility

- ▲ Systems: Since the solutions are hosted in 3DSI's secure data center and not on your computers, they are compatible with all systems that support SSL (EC-Zone and EC-Linx) or FTP (EC-Batch), including Windows, Macintosh, Linux, Unix and more.
- ▲ Applications: 3DSI solutions are easily integrated with accounting ERP and back-office solutions such as SAP, JD Edwards, Oracle and more.

Supports all major platforms

Merchant processing networks connected to the 3DSI gateway include:

- ▲ Global Payments – East
- ▲ Global Payments – Central Token
- ▲ First Data – South
- ▲ First Data – North
- ▲ Vital Processing
- ▲ Fifth Third
- ▲ Nova Information Systems
- ▲ Paymentech – Tampa (certification pending)
- ▲ Paymentech – Salem (certification pending)
- ▲ American Express Direct (certification pending)

Implementation and Training

Hands-on training is offered to new customers via telephone conference call and Web access. Comprehensive user documentation is provided for each deployment. Regardless of the product selected, if you need technical support, 3Delta Systems will work with your staff to ensure a successful implementation.
