viaKLIX

WEB-BASED, HOSTED POINT-OF-SALE SOLUTION

CONVENIENT, AFFORDABLE
POS PROCESSING—WITHOUT
DEDICATED TERMINALS – Looking
for a way to process payments with a
minimal investment of time or money?

NOVA's viaKLIX "virtual terminal" is an easy, economical hosted software solution that lets you use any PC with an Internet connection to efficiently and cost-effectively process credit card transactions. The solution can efficiently handle payment transactions in face-to-face, mail order/telephone order (MO/TO), or e-commerce environments. It's ideal for traveling sales people, or managers who need to process orders after hours from any location. Because it's a hosted solution, there's no limit to how much you can grow your credit card business. Best of all, it's powered by the NOVA Network®, the payment network rated #1 by MasterCard® for speed, availability and reliability.

NOVA NETWORK®

VERSATILE & RELIABLE

- Works as a virtual terminal in both face-to-face and mail order/telephone order (MO/TO) environments
- Smaller businesses can use one PC to do their accounting, manage inventories, and process payments
- Can be quickly and easily accessed from any PC with an Internet connection, using a secure logon
- Supports an unlimited number of users and Merchant IDs – serving retailers of any size
- Connects with the necessary peripherals for face-to-face retail transactions
- Correlates MO/TO authorizations with settlements to ensure that cards are not billed until products are shipped, meeting Visa® and MasterCard® regulations
- Integrates with existing systems, such as accounts receivables, order entry and inventory management systems, reducing duplicate entries and minimizing processing errors

POWERFUL & SECURE DATA MANAGEMENT

- Maintains a detailed record of the most recent 12 months of transaction activity, so you have access to the information you need long after a batch is gone
- Exports comma separated value (CSV) data into other applications for further analysis or tracking
- Employs the latest SSL Certificate encryption technologies to ensure transactions are processed in a safe and secure manner

EFFICIENT & COST-EFFECTIVE

- Offers a lower up-front cost compared to the price of a typical POS terminal
- Leverages existing PC and Internet connections, eliminating the costly need for terminals and dedicated telephone lines
- Matches credit adjustments to authorizations, saving money by minimizing downgraded transactions
- Provides faster authorization and processing times compared to typical dial-up terminals
- No additional fees for software upgrades, new releases or technical support – greatly reducing the total cost of ownership

RELIABLE & EASY TO USE

- Relies on a familiar browser-based interface, making it very easy to navigate
- Screen-sensitive "help" provides instant answers when needed
- User interface is easily configured so that each user can only view and access relevant data and reports
- Utilizes the NOVA Network, rated #1 by MasterCard® for speed, availability and reliability

E-Commerce Feature

"Buy Button" feature can be easily and affordably integrated with your shopping cart to securely process all of your e-commerce transactions. For a developers guide or a list of compatible shopping carts, please visit "Service Information" at www.viaklix.com.
